DESCRIPTORS: *Acrylonitriles, Polymers, *Crystal
structure, Diffraction, Density.

According to the literature polyacrylonitrile is said to
have unit cells of hexagonal structure. It has been es-
tablished that a hexagonal unit cell must be rejected
for several reasons. Owing to the poorly defined dif-
fraction pattern (all the equatorial reflections are ex-
tremely weak, except for two, with blurred diffraction
spots on the other layer lines), the unit diffraction cell
cannot be described with certainty. The observed par-
